Adaptive Learning Game Platform

Transforming textbooks into AI-driven learning journeys

Tagline: Where each chapter is a game, and every student becomes a winner

C by Chaitu Dussa

Made with Gamma

The Problem

1 **Outdated Textbooks**

Static, one-size-fits-all content

2 **Lack of Engagement**

72% of students find textbooks boring

3 **No Personalization**

Frustration and disengagement

4 **Growing Pressure**

Competitive academic environment

Made with Gamma

Student Pain Points

Fear of Falling Behind

Lack of personalized support

Frustration with Learning Pace

Doesn’ t adapt to individual needs

Difficulty Mastering Concepts

Without engaging tools

Made with Gamma

Our Solution

1

Challenge Mode

Engages students through quizzes and tasks

2

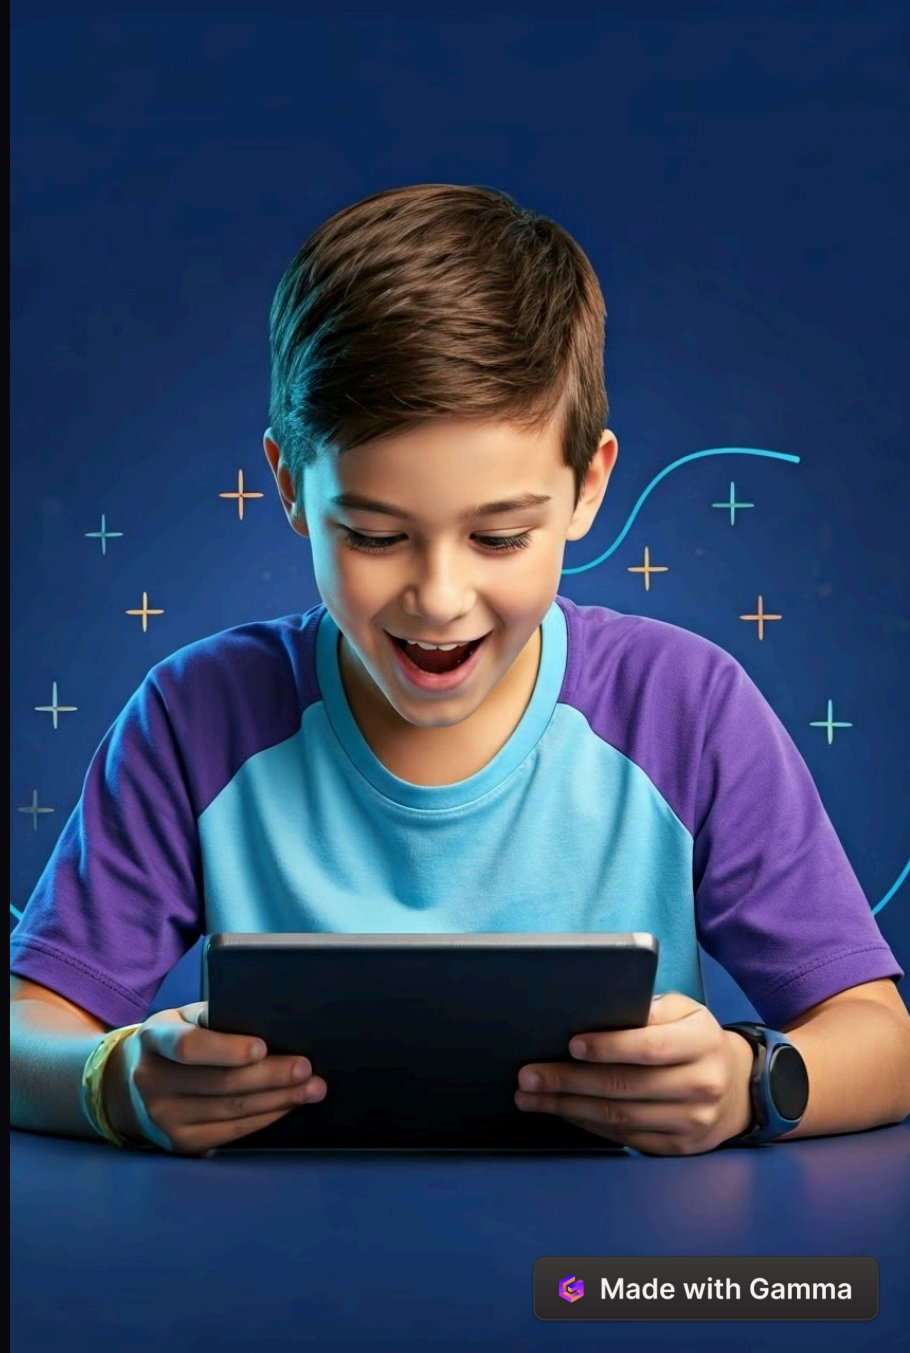

Adaptive Learning Algorithm

Tailors learning pace and difficulty

3

Achievements System

Keeps students motivated with rewards

Made with Gamma

Benefits

For Students

Engagement, personalization, real-time feedback

For Educators

Scalability, data-driven insights, retention

For Schools

Enhanced academic outcomes, adoption of technology

Made with Gamma

Assumptions & Validation Roadmap

1

Core Assumptions

Students are motivated by gaming elements

2

Phase 1

Pilot program with AI-savvy students in India

3

Phase 2

Collect real-time feedback and data

4

Phase 3

Expand to partnerships with schools

5

Phase 4

Refine business model and launch offerings

Made with Gamma

What Makes Us Special

Unique Selling Point

Blend of gaming and education

AI-Powered Personalization

Real-time adjustment of difficulty

Gamification that Drives Results

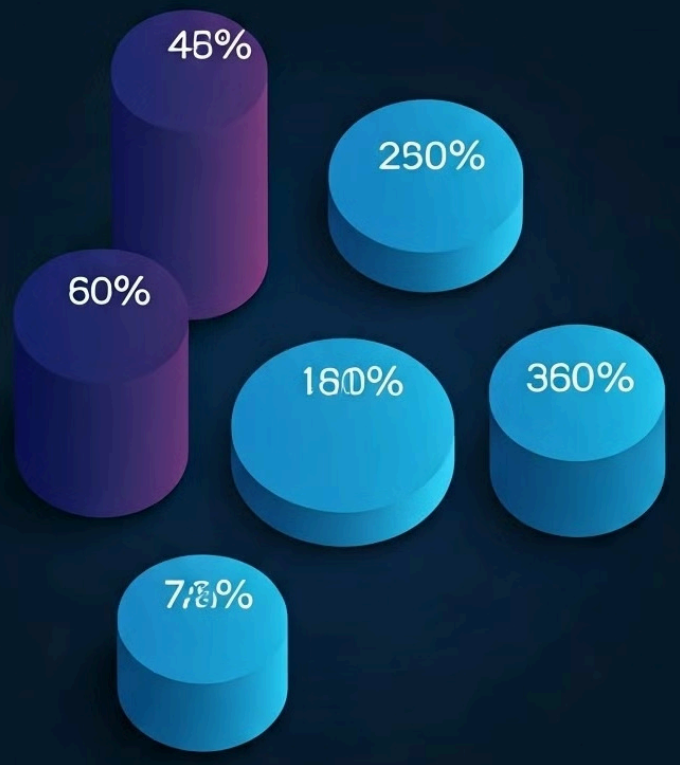

Students progress through “challenge levels”

Data-Driven Learning

Insights into student performance

Made with Gamma

Business Model

Subscription-Based	Freemium model
B2C Offering	Direct-to-consumer monthly/annual subscriptions
B2B Offering	Partnerships with educational institutions
Additional Revenue Streams	Partnerships with textbook publishers
